Chat

Chat

Justin LeClair
Hi guys hows the new update coming?

Drew Johnson
Yeah Justin can I get an update as well?

Greg Guidone
Keep me posted...

Derrick Xu
Well we couldn't get the build out last night but were working on it now.

**Justin LeClair**
Ok, how long do you think that will take?

Derrick Xu
Shouldn't take too long. Maybe about 30 more mins.
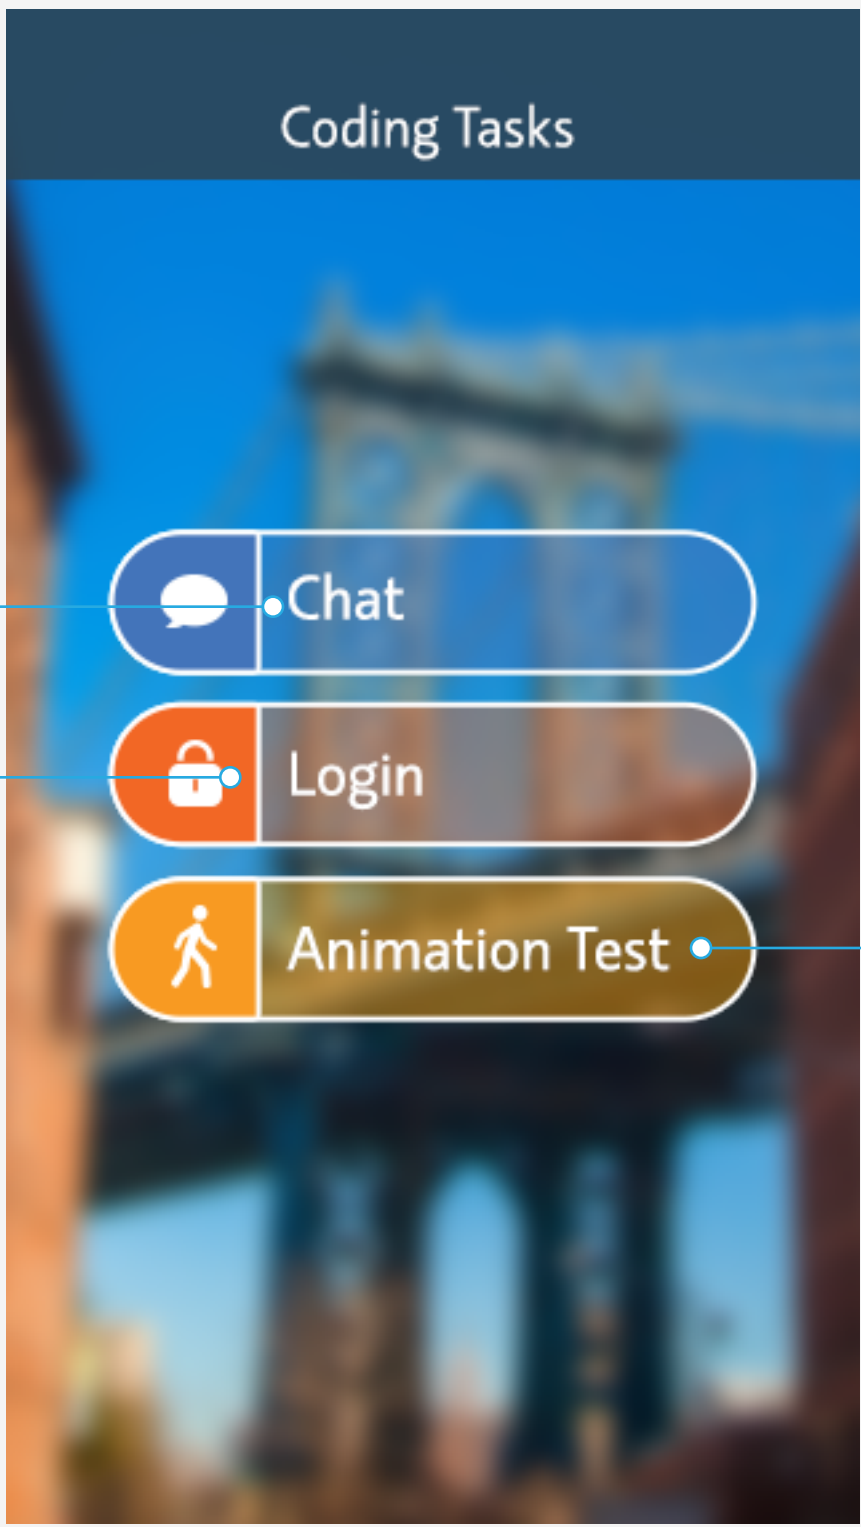

Load the JSON file 'TableSection/JSON/chatData.json' and display the chat messages in the TableView

Login

Login

username

password

Log in

1. Send an asynchronous POST request to http://dev.apppartner.com/AppPartnerProgrammerTest/scripts/login.php

2. The POST request must contain the parameters 'username' and 'password'

3. You will receive a JSON response back with a 'code' and a 'message'

4. Display the parsed code and message in a UIAlert along with how long the api call took in miliseconds

5. The only valid login is username: SuperBoise password: qwerty

6. When a login is successful, tapping 'OK' on the UIAlert should bring us back to the MainMenuViewController

Animation Test

Animation

Spin

Animate the App Partner icon. Make it spin around 360 degrees when the Spin button is pressed. Allow it to be dragged around the screen by touching and dragging.

Bonus points for creativity!
